- A C Pro Ultra Synthetic Oil
- Oil filter (if changing)
- Oil filter wrench
- Socket wrench set
- Oil drain pan
- Funnel
- Rags or paper towels
- Gloves (optional for cleanliness)

2. Prepare Your Vehicle

- Park on a Level Surface: Ensure your vehicle is parked on a flat surface to allow for accurate oil level readings.
- Turn Off the Engine: Make sure the engine is off and has cooled down to avoid burns from hot oil.

- Raise the Vehicle (if necessary): If your vehicle requires it, use jack stands to lift the car safely.

3. Drain Old Oil

1. Remove the Oil Drain Plug: Place the oil drain pan under the engine's oil pan and use a socket wrench to remove the drain plug. Allow the old oil to fully drain into the pan.
2. Replace the Drain Plug: Once all the oil has drained, replace the drain plug securely.

4. Replace the Oil Filter (if applicable)

- 1. Locate the Oil Filter: Use an oil filter wrench to remove the old oil filter. Be cautious, as it may still contain some oil.**
- 2. Prepare the New Filter: Apply a small amount of the new oil to the rubber gasket of the new filter. This helps ensure a good seal.**
- 3. Install the New Filter: Screw in the new oil filter, ensuring it's snug but not over-tightened.**

5. Add A C Pro Ultra Synthetic Oil

- 1. Open the Hood: Locate the oil filler cap on the engine.**
- 2. Use a Funnel: Place a funnel in the opening to avoid spills.**
- 3. Pour in the Oil: Refer to your vehicle's owner manual for the correct oil capacity. Pour the recommended amount of A C Pro Ultra Synthetic oil into the engine.**
- 4. Replace the Oil Cap: Ensure the oil cap is securely tightened.**

6. Check Oil Level

- After adding oil, wait a few minutes for it to settle, then use the dipstick to check the oil level. Add more oil if necessary, ensuring it does not exceed the maximum mark.

7. Start the Engine

- Start the engine and let it run for a few minutes. This allows the new oil to circulate throughout the engine. Check for any leaks under the vehicle.

8. Dispose of Old Oil Properly

- Take the old oil and filter to a recycling center or an auto parts store that accepts used oil. Do not dispose of it in the trash or pour it down the drain.
