Time Management and Exam Day Tips

Effective time management during the exam is crucial to maximizing performance. The ACS inorganic chemistry exam study guide provides practical advice for exam day preparation and execution.

Allocating Time per Question

With approximately 60 to 70 questions in 2 hours, students should aim to spend about 1.5 to 2 minutes per question. Prioritizing easier questions first can help secure quick points before tackling more challenging problems.

Reading Questions Carefully

Thoroughly reading each question and all answer choices reduces errors caused by misinterpretation. Paying attention to qualifiers such as "not" or "except" is essential for selecting the correct response.

Managing Stress and Staying Focused

Maintaining a calm and focused mindset improves concentration and decision-making. Techniques such as deep breathing, scheduled breaks, and positive visualization can help manage exam anxiety.

Reviewing Answers if Time Permits

If time remains after completing all questions, reviewing answers can catch careless mistakes or misread questions. However, avoid second-guessing unless confident that the initial choice was incorrect.
