Each section tests knowledge in various domains, and candidates must pass all four to obtain their CPA license. The exam's structure and content can significantly influence the AIC exam pass rate.

Exam Structure and Format

The AIC exam is a computer-based test (CBT) that includes multiple-choice questions, task-based simulations, and written communication tasks. Each section is allotted a specific amount of time:

- AUD: 4 hours

This structure requires not only knowledge but also time management and critical thinking skills. Candidates must be adept in various areas to navigate the exam successfully.
