What is a Ghost Writing Book?

The ghost writing book is a specific item that players can use during their ghost-hunting expeditions. It is a simple notebook that can be placed on surfaces in the game environment. When a ghost is nearby, it may interact with the book and write messages, providing crucial clues.

How to Use the Ghost Writing Book

Using the ghost writing book effectively involves several steps:

1. **Acquire the Book:** Players can find the ghost writing book in the supply van before heading into the haunted location.
2. **Place the Book:** Once inside the haunted area, players should find a suitable surface (like a table or the floor) and place the book there.
3. **Turn Off Lights:** Ghosts are more likely to write in the book when the lights are off or dimmed. Consider turning off the lights to increase the chances of ghostly interaction.
4. **Wait for Interaction:** After placing the book, wait in the vicinity for the ghost to make its appearance. If the ghost is active, it may write in the book.

5. **Check for Writings:** After some time, return to the book and check for any messages. If the ghost has written, it will appear in the book as a text entry.

When a ghost interacts with the writing book, it can produce different types of messages, each providing insights into the ghost's nature and behavior. Here are the common types of writings you may encounter:

- **Basic Messages:** These are simple phrases or words that can range from one-word answers like "Help" or "Leave" to complete sentences.
