Preparation Before Cooking

Before you start making waffles, there are a few preparatory steps you should take:

Gather Your Ingredients

For basic waffles, you'll need the following ingredients:

- 1 3/4 cups all-purpose flour
- 1 tablespoon sugar

- 1 tablespoon baking powder
- 1/2 teaspoon salt
- 2 large eggs
- 1 3/4 cups milk
- 1/2 cup vegetable oil or melted butter

These ingredients can be adjusted based on personal preferences or dietary needs.

Preheat the Waffle Maker

1. Plug in the Ambiano waffle maker.
2. Turn it on and wait for the indicator lights to signal that it's preheating. This usually takes about 5 minutes. The ready light will typically turn on when the plates are hot enough for cooking.

Step-by-Step Instructions for Making Waffles

Now that you're prepared, let's get into the cooking process.

Mixing the Batter

1. Combine Dry Ingredients: In a large bowl, mix together the flour, sugar, baking powder, and salt.
2. Combine Wet Ingredients: In another bowl, whisk the eggs, milk, and vegetable oil or melted butter until well combined.
3. Combine Mixtures: Gradually add the wet mixture to the dry ingredients, stirring until just combined. Be careful not to overmix; a few lumps are okay.

Cooking the Waffles

1. Add Batter to the Waffle Maker: Open the waffle maker and lightly grease the plates with cooking spray or a small amount of oil. Pour the batter onto the center of the bottom plate, using a ladle or measuring cup. For most models, about 1 cup of batter works well, but this can vary based on the size of your waffle maker.
2. Close the Waffle Maker: Gently close the lid, making sure not to press down too hard, as this can squish the batter out.

3. **Cooking Time:** Allow the waffles to cook for about 5 to 7 minutes. The cooking time will depend on your specific model and how crispy you like your waffles. Check for the indicator light; most waffle makers will signal when the waffles are ready.
4. **Remove the Waffles:** Once done, use a non-metallic spatula to carefully lift the waffles out of the maker. Be cautious as the plates will be hot.
5. **Keep Warm (Optional):** If you're making multiple batches, keep the finished waffles warm in a low-temperature oven (around 200°F or 93°C) while you cook the remaining batter.

Tips for Perfect Waffles

To achieve the perfect waffle every time, consider the following tips:

- **Don't Overmix:** A few lumps in the batter are fine. Overmixing can lead to tough waffles.
- **Experiment with Flavors:** Add vanilla extract, cinnamon, or even chocolate chips to the batter for added flavor.
- **Adjust Cooking Time:** If your waffles are not browning as you like, try adjusting the cooking time or the temperature setting (if available).
- **Keep It Clean:** Always clean the waffle maker after each use. Unplug it and allow it to cool before wiping down the plates with a damp cloth.

Cleaning Instructions
