Early Life and Influences

Ansel Easton Adams was born on February 20, 1902, in San Francisco, California. His early years were marked by a love for nature, which was instilled in him by his father, who often took him on outings to the nearby Presidio and Golden Gate Park. This connection to the outdoors would later become a significant theme in Adams' work.

Adams' interest in photography began at the age of 14 when he received a Kodak Brownie camera as a gift. His first experience with photography was during a family trip to Yosemite National Park in 1916, where he captured images that would foreshadow his future career. After studying music and briefly working as a piano teacher, Adams decided to pursue photography full-time, influenced by notable photographers like Edward Weston and Alfred Stieglitz.

Career and Photographic Techniques
