Free-Response Scoring

Free-response questions are scored by college faculty and experienced educators using detailed rubrics. Scores reflect the quality of analysis, accuracy of content, and clarity of writing. Each free-response question contributes equally to the final score.

Composite Score and AP Grade

The combined scaled scores from both sections determine the overall AP score, ranging from 1 to 5. A score of 3 or higher is generally considered passing and may qualify students for college credit, depending on the institution.

Score Distribution and Interpretation

The College Board releases score distributions after each exam administration, providing insight into how students performed nationally. These statistics help educators and students gauge the exam's difficulty and set realistic expectations.
