- Remote Control: If your model includes a remote, familiarize yourself with its functions, such as advancing slides or adjusting settings from a distance.
- Zoom Function (if available): Adjust the zoom to fit larger transparencies into the frame without losing clarity.

Maintenance of the Apollo Horizon 2

To prolong the life of your Apollo Horizon 2 Overhead Projector and ensure optimal performance, regular maintenance is essential.

Cleaning the Projector

- Exterior Cleaning:
 - Use a soft, lint-free cloth to wipe down the casing.
 - Avoid using harsh chemicals that could damage the surface.
- Lens Cleaning:
 - Use a lens cleaning solution and a microfiber cloth to gently clean the projector lens.
 - Ensure that the lens is free from dust and smudges for clear projections.

Replacing the Bulb

The bulb will eventually require replacement. To do this safely:

1. Power Off: Turn off the projector and unplug it from the power source.
2. Allow to Cool: Wait for the projector to cool down before handling.
3. Locate the Bulb Compartment: Refer to the user manual for the exact location.
4. Replace the Bulb: Carefully remove the old bulb and install the new one, following any specific instructions provided in the manual.

Troubleshooting Common Issues

Despite its reliability, users may encounter some common issues with the Apollo Horizon 2. Here's how to troubleshoot them:

Image Not Projecting

- Check Power Connection: Ensure the projector is plugged in and the power outlet is functional.
- Inspect Bulb: If the bulb is burnt out, replace it as described above.
- Transparency Placement: Make sure the transparency is correctly positioned on the glass stage.

Poor Image Quality

- Adjust Focus and Brightness: Use the control panel to enhance image clarity.
- Clean the Lens: If the lens is dirty, clean it carefully with a microfiber cloth.

Overheating Issues

- Ensure Ventilation: Verify that the projector's vents are not blocked to allow proper airflow.
- Allow for Cooling: If the projector has been in use for an extended period, allow it to cool down before continuing usage.
