2. Find a Local Exam Session

Once you feel prepared, the next step is to locate a local exam session. The ARRL website provides resources for finding testing locations and schedules. Exam sessions are typically administered by Volunteer Examiners (VEs), who are licensed amateur radio operators trained to conduct the tests.

3. Take the Exam

The exam consists of multiple-choice questions and varies in difficulty based on the license class. Each class has a different number of questions and passing scores:

- Technician Class: 35 questions, passing score of 26.
- General Class: 35 questions, passing score of 26.
- Extra Class: 50 questions, passing score of 37.

4. Receive Your License

After successfully passing the exam, your information will be submitted to the FCC, and you will receive your amateur radio license, allowing you to operate on designated frequencies.
