Author of the Epic of Gilgamesh is an enigmatic figure shrouded in the mists of ancient history. The Epic of Gilgamesh, one of the oldest known pieces of literature, originated in ancient Mesopotamia, specifically within the Sumerian civilization around 2100 BCE. This epic poem chronicles the adventures of Gilgamesh, a historical king of Uruk, and explores themes of friendship, mortality, and the quest for eternal life. While the epic itself is a collaborative work of different authors over centuries, its creation is often attributed to a particular scribe and a rich oral tradition that shaped its narrative. Understanding the authorship of this monumental work provides insight into the cultural and historical context of ancient Mesopotamia.

Historical Context of the Epic of Gilgamesh

The Epic of Gilgamesh has its roots in the Sumerian civilization, which flourished in the southern regions of Mesopotamia. This period was marked by the development of city-states, monumental architecture, and early forms of writing. The Sumerians invented cuneiform, one of the earliest systems of writing, which allowed them to record their stories, laws, and administrative details.

The Origins of the Epic

1. Sumerian Legends: The earliest versions of the Gilgamesh narrative were likely oral tales passed down through generations. These stories were eventually transcribed onto clay tablets using cuneiform script.
2. Historical Gilgamesh: Gilgamesh was a real historical figure who reigned around 2700 BCE in Uruk. He is often depicted as two-thirds divine and one-third human, embodying both the strengths and weaknesses of humanity.
3. Compilation and Adaptation: The epic we know today emerged in its most complete form during the Old Babylonian period (circa 2000-1600 BCE). Various scribes and poets contributed to its development, adapting and expanding upon earlier Sumerian stories.

creation.

The Role of Scribes
