Tips for Optimal Use and Maintenance

To get the most out of your Bissell CleanView vacuum, consider the following tips:

1. Regular Filter Cleaning

Cleaning the filter regularly can significantly enhance the vacuum's performance. Bissell typically recommends washing the filter every 1-3 months, depending on usage. Ensure the filter is completely dry before reinserting it into the vacuum.

2. Keep the Brushes Clear

Hair and debris can accumulate in the brush roll, affecting cleaning performance. Regularly check the brush roll and remove any tangled hair or fibers. Most Bissell CleanView models have a brush roll that can be easily accessed for maintenance.

3. Vacuum in Sections

For optimal cleaning, divide your space into manageable sections. This approach prevents missing spots and ensures thorough cleaning. Additionally, slow, deliberate passes over high-traffic areas can help lift embedded dirt.

4. Use the Right Attachments

Take advantage of the vacuum's various attachments for specialized tasks. For example, use the crevice tool for tight spaces, the upholstery brush for furniture, and the dusting brush for delicate surfaces.

5. Store Properly

When not in use, store the vacuum in a cool, dry place. Ensure the power cord is neatly wrapped to avoid damage and prevent tripping hazards.
