Troubleshooting Tips

Even with regular maintenance, issues can arise. Here are some common problems and troubleshooting tips that can be found in the service manual:

Starting Issues

If the bike won't start, check the following:

- Battery charge: Ensure the battery is fully charged and connections are clean and tight.
- Fuel supply: Confirm there is fuel in the tank and that the fuel lines are not clogged.
- Kill switch: Make sure the kill switch is in the "run" position.

Electrical Problems

For electrical issues:

- Inspect fuses: Replace any blown fuses as per the manual's guidelines.
- Check wiring: Look for damaged or frayed wires, especially in high-stress areas.
- Test components: Use a multimeter to test switches and sensors.

Suspension Issues

If the suspension feels off:

- Check fluid levels: Ensure fork oil levels are adequate and replace if necessary.
- Inspect for leaks: Look for signs of oil leakage from the forks or shocks.
- Adjust settings: Use the manual to adjust suspension settings according to your riding style.
