Thales and Early Pre-Socratics

Thales of Miletus is often regarded as the first philosopher in Western history. He proposed that water is the fundamental substance of all things, a radical idea that set the stage for subsequent inquiries into the nature of reality. His approach emphasized the importance of self-examination and the pursuit of knowledge. Plato, his student, expanded on his ideas and established the Theory of Forms, positing a distinction between the material world and the realm of ideals.

Aristotle: The Systematizer of Knowledge

Aristotle, a student of Plato, offered a systematic approach to philosophy that encompassed a wide range of disciplines, including biology, ethics, politics, and metaphysics. His emphasis on empirical observation and categorization laid the groundwork for the scientific method and has had a lasting impact on various fields of study.
