Use the structured approach you practiced to frame your responses. Ensure that your analysis is logical and flows well, making it easier for the interviewer to follow your reasoning.

4. Quantify Your Analysis

Whenever possible, incorporate quantitative data into your analysis. This adds credibility to your recommendations and shows your ability to work with numbers.

5. Summarize Your Findings

At the end of your analysis, provide a concise summary of your findings and recommendations. This reinforces your conclusions and leaves a strong
