This ability encourages players to build cities in forest-rich areas, turning Vietnam into a powerhouse for cultural and scientific development.

### Unique Unit: "Voi Chiến"

Vietnam's unique unit, the "Voi Chiến," replaces the standard knight and offers several advantages:

- Strength: The Voi Chiến boasts a higher combat strength than the knight, making it a formidable force on the battlefield.

## Strategies for Playing Vietnam

To effectively utilize Vietnam's unique abilities, players should adopt specific strategies that align with its strengths. Here are some essential strategies for success.

### Early Game Development

In the early game, focus on the following:

1. City Placement: Choose city locations near forests or jungles to capitalize on the "Nine Dragon River Delta" ability. This placement will increase adjacency bonuses for districts.
2. Focus on Expansion: Rapid expansion is key. Use settlers to establish new cities in forest-rich areas, ensuring you can build multiple districts that benefit from adjacency bonuses.
