Getting Started with the Coats 10 10 Tire Machine

Before operating the Coats 10 10 tire machine, it is crucial to familiarize yourself with its components and functions. The machine typically consists of:

Main Components

1. **Mounting Head:** This is the part that helps in mounting and demounting

the tires.

2. **Turntable:** The turntable holds the wheel in place during the tire change process.
3. **Bead Breaker:** A crucial tool for separating the tire bead from the wheel.
4. **Control Panel:** The user interface for operating the machine.
5. **Safety Guards:** These protect the operator and the machine during operation.

Operating the Coats 10 10 Tire Machine

Proper operation of the Coats 10 10 tire machine involves several key steps. Follow this guideline to ensure efficient and safe use:

Step-by-Step Operation

1. Preparation:
 - Inspect the machine for any visible damage or wear.
 - Ensure that all safety guards are in place.
 - Verify that the machine is plugged in and powered on.
2. Setup:
 - Position the wheel on the turntable and secure it using the clamps.
 - Adjust the height of the turntable, if necessary, to match the size of the wheel.
3. Bead Breaking:
 - Activate the bead breaker to separate the tire from the wheel.
 - Ensure that the bead breaker is properly aligned with the tire.
4. Tire Removal:
 - Use the mounting head to demount the tire from the wheel.
 - Rotate the turntable as needed to facilitate the removal process.
5. Tire Installation:
 - Apply lubricant to the tire bead for easier mounting.
 - Position the new tire onto the wheel and use the mounting head to secure it in place.
6. Final Steps:
 - Inflate the tire to the recommended pressure.

- Inspect the installation to ensure that the tire is properly seated on the rim.

Maintenance of the Coats 10 10 Tire Machine

Regular maintenance is crucial for the longevity of the Coats 10 10 tire machine. Here are some essential maintenance tips:

Daily Maintenance Checks
