Prioritizing Upgrades

When you first reach TH11, it can be overwhelming to decide which upgrades to prioritize. Below is a recommended upgrade order to maximize your efficiency and effectiveness.

1. Defensive Structures

- Eagle Artillery: This should be your first priority. Its long-range attack can devastate enemy troops, making it crucial for defending against higher-level attacks.
- Inferno Towers: Upgrade these to provide powerful single-target damage, especially against high-health troops.
- X-Bows: Ensure your X-Bows are well-placed and upgraded, as they provide significant protection against ground and air attacks.
- Air Defenses: Upgrade your air defenses to fend off powerful air units like Dragons and Minions.

2. Offense Enhancements

- Grand Warden: Upgrade him as soon as possible. His ability to enhance troop health in battle can be a game-changer.
- Laboratory: Upgrade your Laboratory to unlock new troop levels. Prioritize troops that fit your attack strategy.
- Spell Factory: Upgrade this to unlock new spells, including the powerful Jump and Freeze spells.

3. Resource Management

- Collectors and Mines: Upgrade your Gold Mines, Elixir Collectors, and Dark Elixir Drills. This will ensure a steady resource flow for future upgrades.
- Storage Units: Don't forget to upgrade your storage buildings to accommodate the increased resource limits.

Base Layout Strategies

A well-structured base layout is critical at TH11. Your goal is to protect your resources and key defensive structures. Here are some strategies to consider when designing your base.

1. Centralized Town Hall

- Place your Town Hall at the center surrounded by your most valuable defenses and traps. This will make it difficult for attackers to simply snipe it for trophies.

2. Compartmentalization

- Create compartments with walls to slow down enemy troops. This can help your defenses deal with attackers more effectively.

3. Trap Placement

- Strategically place traps in areas where you expect enemy troops to swarm. This can include Giant Bombs near high-value defenses or Spring Traps in areas where troops are likely to bunch up.

4. Balance Offense and Defense

- Ensure that your base has a good balance of defenses and resources. If attackers can easily access

your resources, they'll likely come back for more.
