Understanding Compound Sentences

A compound sentence is a sentence that contains at least two independent clauses joined by a coordinating conjunction. Independent clauses are groups of words that can stand alone as complete sentences. The conjunctions that typically connect these clauses include "and," "but," "or," "nor," "for," "so," and "yet."

Components of Compound Sentences

To grasp the concept of compound sentences, it is essential to understand their components:

1. Independent Clauses: Each part of a compound sentence must be able to function as a complete sentence on its own.
2. Coordinating Conjunctions: These words connect the independent clauses.
3. Punctuation: A comma is usually placed before the conjunction when connecting two independent clauses.

Examples of Compound Sentences

Here are some examples of compound sentences:

- I wanted to go to the park, but it started to rain.
- The dog barked loudly, and the cat ran away.
- She can play the piano, or she can play the guitar.

In each of these examples, you can see how the independent clauses are joined by a conjunction, forming a compound sentence.
