Understanding Ascension in Cookie Clicker

Ascension is a core mechanic in Cookie Clicker that allows players to reset their progress in exchange for heavenly chips and other bonuses. These bonuses can amplify your cookie production, making future runs significantly more productive.

What Happens When You Ascend?

When you choose to ascend, you will:

1. **Reset your game progress:** Your cookie count, buildings, and achievements will be wiped clean.
2. **Gain Heavenly Chips:** These chips are earned based on the number of cookies you've baked and can be spent on powerful upgrades.
3. **Unlock new features:** Ascending opens up new layers of gameplay, including the ability to unlock powerful upgrades and achievements.

When to Ascend

Knowing the right time to ascend is crucial for maximizing your cookie production. Here are some guidelines to help you decide:

Signs That It's Time to Ascend

- **You've Accumulated a Significant Cookie Count:** Generally, players should aim to have baked at least one trillion cookies before considering ascension.
- **You're Unable to Purchase New Buildings or Upgrades:** If you find that the cost of buildings has outpaced your cookie production, it's time to reset.
- **You've Completed Most Achievements:** Achievements provide boosts and bonuses; once you've ticked off a significant number, consider ascending.

How to Prepare for Ascension

Before you hit the ascend button, there are several steps you can take to ensure that you maximize your heavenly chips and future cookie production.

Maximizing Cookie Production Before Ascending

1. **Focus on Upgrades:** Prioritize purchasing upgrades that enhance your cookie production, especially those that increase the efficiency of your buildings.
2. **Complete Achievements:** Work towards completing as many achievements as possible before ascending, as they provide heavenly chips upon resetting.
3. **Utilize Golden Cookies:** Make sure to take advantage of golden cookies when they appear. Their

effects can significantly boost your cookie count, especially during the final push before ascension.

Calculate Your Heavenly Chips

To estimate how many heavenly chips you will earn, use the following formula:

- Heavenly Chips = $\text{floor}(\text{baked cookies} / 1\text{e}12)$

This means that for every trillion cookies you've baked, you'll receive one heavenly chip upon ascension.

Once you've ascended and gained your heavenly chips, it's time to spend them wisely. Certain upgrades can significantly enhance your cookie production and should be prioritized.

Essential Upgrades for New Runs

- Heavenly Luck: Increases the frequency of golden cookies, which can provide massive boosts to your cookie production.
- Sugar Lumps: These are essential for upgrading your buildings further and should be prioritized to enhance production.
- Elder Covenant: This upgrade can help you maximize production at the cost of a few elder gods, but the benefits often outweigh the drawbacks.
