basic steps to get you started:

Preparation Before Mowing

3. Blade Condition: Examine the mower blade for damage or dullness. A sharp blade ensures a clean cut and healthier grass.
4. Height Adjustment: Set the cutting height based on your lawn's needs. The manual will guide you on how to adjust the cutting deck.

Starting the Mower

1. Engage the Safety Features: Most models require you to engage specific safety features before starting.
2. Prime the Engine: If your model requires priming, locate the primer bulb and press it as directed in the manual.
3. Start the Engine: Follow the manual's instructions for starting the mower, typically involving pulling the starter cord or pressing a button for electric models.

Operating the Mower

- Adjust Speed: Use the variable speed control to match your pace.
- Mow in Stripes: For a neat appearance, mow in straight lines, alternating directions for each pass.

Maintenance Tips for Your Craftsman Self Propelled Lawn Mower

Regular maintenance is vital to keep your mower running smoothly and efficiently. The Craftsman self propelled lawn mower manual provides an extensive maintenance schedule, but here are some key practices:

Regular Cleaning

2. Air Filter Replacement: Inspect and replace the air filter to ensure optimal engine performance.
3. Spark Plug Check: Replace the spark plug annually for better starting and engine efficiency.

Seasonal Preparation

- Winterize Your Mower: Before storing your mower for winter, run it until empty, change the oil, and clean it thoroughly.
- Spring Startup: Check all components, including fuel and oil, before using the mower in the spring.
