Operating the Datsun FG 103 Forklift

To ensure safe and efficient operation, operators should follow the guidelines outlined in the manual.

Starting the Forklift

1. Pre-Check: Conduct a thorough pre-operation inspection, checking for:

- Fluid levels (oil, coolant, etc.)
- Tire condition
- Fork and mast functionality
- Safety features (horn, lights, etc.)

2. Starting Procedure:

- Sit in the operator's seat and fasten the seatbelt.
- Insert the key and turn it to the "ON" position.
- Press the brake pedal and turn the key to start the engine.
- Allow the engine to warm up before engaging in lifting operations.

Loading and Unloading

- Ensure the load is within the capacity limits specified in the manual.
- Center the load on the forks.
- Lift the load to a few inches above the ground, then drive to the desired location.
- Lower the load gently and ensure it is stable before retracting the forks.

Maintenance of the Datsun FG 103 Forklift

Regular maintenance is vital for the forklift's performance and longevity. The Datsun FG 103 forklift manual provides a comprehensive maintenance schedule that should be adhered to.

Daily Maintenance Checklist

- Check fluid levels (engine oil, hydraulic fluid, coolant).
- Inspect the tires for wear and proper inflation.
- Test the functionality of the brakes, horn, lights, and other safety features.
- Inspect forks and mast for any signs of damage.

Weekly and Monthly Maintenance Tasks

- Weekly:
 - Clean the forklift, paying attention to the engine and undercarriage.
 - Check the battery (if applicable) and clean terminals.
- Monthly:
