Understanding the Davis Drug Guide 18th Edition

The Davis Drug Guide 18th edition is a comprehensive pharmacological reference widely used in healthcare settings. It provides detailed information on drug indications, dosages, side effects, interactions, and patient education. This authoritative guide is designed to support safe medication administration and informed clinical decision-making. The 18th edition reflects the latest updates in drug therapies, incorporating new evidence and regulatory changes. As a frequently cited resource in nursing, pharmacy, and medical literature, understanding its structure and content is fundamental for accurate citation. The guide is published by F.A. Davis Company and is available in both print and digital formats.

Content and Utility of the Guide

The Davis Drug Guide 18th edition includes comprehensive monographs for thousands of medications. Each monograph contains critical clinical information such as

pharmacokinetics, contraindications, and monitoring parameters. This makes it indispensable for healthcare providers who must reference drug data quickly and reliably. Its user-friendly layout and evidence-based content contribute to its widespread adoption in academic and clinical settings.

Authorship and Publication Details

The guide is authored by Pharmacists and healthcare experts who compile and verify the drug information. The 18th edition was published in 2022 by F.A. Davis Company, a recognized publisher in medical and nursing literature. Accurate identification of authorship and publication year is vital when creating an APA citation to avoid plagiarism and ensure source traceability.

Fundamentals of APA Citation Style

APA (American Psychological Association) citation style is a widely used referencing format in the social sciences and health-related fields. It emphasizes author-date citation, facilitating the reader's ability to locate sources quickly. Understanding the basic elements of APA style is essential when citing any source, including the Davis Drug Guide 18th edition. The core components of an APA citation include author(s), publication year, title of the work, edition (if applicable), publisher, and sometimes location.

Key Elements of APA Citations

An APA citation for a book or guide typically includes the following:

- **Author(s):** The individual(s) or organization responsible for the content.
- **Publication Year:** The year the edition was published.
- **Title:** The full title of the work in italics.
- **Edition:** Specified if not the first edition.
- **Publisher:** The company or entity that published the work.

For electronic sources, additional elements such as URLs or DOIs may be included, but this depends on the source type.

In-Text Citation Basics

In APA style, in-text citations typically include the author's last name and the publication year. For example: (Author, Year). When citing the Davis Drug Guide 18th edition, the in-text citation will depend on how the source is referenced in the reference list.

How to Cite Davis Drug Guide 18th Edition in APA

Citing the Davis Drug Guide 18th edition in APA format requires attention to detail to ensure all citation components are correctly formatted. The citation format varies slightly depending on whether the guide is used in print or accessed electronically. Below are the general guidelines for both formats.

APA Citation Format for Print Version

When referencing the print version of the Davis Drug Guide 18th edition, the standard APA citation format includes the author(s), publication year, title with edition number, and publisher. An example format is as follows:

1. Author(s). (Year). *Title of book* (Edition). Publisher.

For the Davis Drug Guide 18th edition, since it is authored by F.A. Davis Company, the citation may appear like this:

1. F.A. Davis Company. (2022). *Davis drug guide* (18th ed.). F.A. Davis Company.

APA Citation Format for Electronic Version

If the guide is accessed online or via an electronic database, the citation should include the DOI or URL, if available, following the publisher information. The format is:

1. Author(s). (Year). *Title of book* (Edition). Publisher. URL or DOI

Example:

1. F.A. Davis Company. (2022). *Davis drug guide* (18th ed.). F.A. Davis Company.
<https://doi.org/xxxxx>

Note that if there is no DOI or stable URL, it is acceptable to omit this element in APA 7th edition.

Common Citation Variations and Examples

Different academic institutions or publications may require slight variations in citing the Davis Drug Guide 18th edition. Understanding common variations helps ensure compliance with specific style guides while maintaining APA integrity.

Citing Specific Sections or Authors

Occasionally, chapters or sections within the guide may have individual authors. In such cases, the citation should credit the specific author(s) of the section rather than the overall publisher. The format would then resemble a chapter citation:

1. Author(s) of chapter. (Year). Title of chapter. In Editor(s) (Ed.), *Title of book* (Edition, pp. pages). Publisher.

However, as the Davis Drug Guide is usually attributed to the publisher as a corporate author, this case is rare.

Examples of In-Text Citations

- Parenthetical citation: (F.A. Davis Company, 2022)
- Narrative citation: F.A. Davis Company (2022) states that...

Practical Tips for Accurate Drug Guide Citation

Ensuring accuracy in citing the Davis Drug Guide 18th edition improves the credibility of academic work and facilitates source verification. Below are some practical tips to consider when preparing APA citations for this resource.

Verify Edition and Publication Year

Always confirm that the 18th edition is the source being cited, as earlier editions may have different content. The publication year for the 18th edition is typically 2022, which should be reflected in the citation.

Use Corporate Authorship When Appropriate

Since the Davis Drug Guide is commonly published under the corporate author F.A. Davis Company, use this as the author in the citation unless specific individual authors are identified.

Include Edition Information

Indicating the edition number is essential because drug information is frequently updated. The 18th edition should be clearly stated as (18th ed.) in the citation.

Check for Digital Object Identifiers (DOIs)

If accessing the guide electronically, include the DOI if available. This provides a persistent link to the content and aligns with APA 7th edition recommendations.

Maintain Consistency Across References

Ensure that all citations of the Davis Drug Guide 18th edition within a document follow the same APA format to maintain professionalism and clarity.

Frequently Asked Questions

How do I cite the Davis's Drug Guide 18th edition in APA format?

In APA format, the citation for Davis's Drug Guide 18th edition is: Vallerand, A. H., Sanoski, C. A., & Deglin, J. H. (2017). *Davis's drug guide for nurses* (18th ed.). F.A. Davis Company.
